

EMMANUEL AONDOHEMBA

Software Developer | Full-Stack Web & Mobile Engineer

Benue, Nigeria • 09164228242 • dominicternngu123@gmail.com

[LinkedIn](#) • [GitHub](#)

PROFILE

Software developer building production-style web, mobile, fintech, travel, and document-intelligence products. Strong across TypeScript/React ecosystems, Expo/React Native, API integration, PostgreSQL data modeling, platform administration tooling, and Python/FastAPI services.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, SQL, HTML, CSS
Frontend & Mobile	React, Next.js, React Native, Expo, Expo Router, Vite, Tailwind CSS, shadcn/Radix UI
Backend & Data	FastAPI, REST APIs, Prisma, PostgreSQL, Convex, Redis/Upstash, PyMuPDF, pdfplumber
Cloud, AI & Tools	BGE embeddings, Groq, Clerk, Cloudflare R2/S3 storage, Modal, Vercel, Resend, Cloudinary, Git/GitHub, Figma

PROFESSIONAL EXPERIENCE

Lead Frontend Engineer | Edgeworth

Jun 2026 - Present

- Own frontend development across web and React Native mobile applications for Edgeworth's capital-allocation and copy-trading platform.
- Build TypeScript trading experiences across dashboard, trading terminal, copy trading, wallet, and strategy profiles, integrating REST APIs, real-time WebSocket data, charts, KYC, and billing flows.
- Develop the Expo/React Native iOS and Android application and collaborate across engineering and design on responsive, performant product delivery.

Python Programmer Intern | Greg & Co ICT Hub

6-month internship | Makurdi, Nigeria

- Gained hands-on Python experience working with practical scripts and existing codebases in an ICT development environment.
- Managed, reviewed, maintained, and modified Python code while strengthening debugging, code organization, and problem-solving skills.

SELECTED PROJECTS

Studora | Academic Social & AI Study Platform

Next.js • TypeScript • Expo/React Native • Convex • PostgreSQL • Clerk • AI integrations

Web Platform

- Built a full-stack academic platform combining course resources, social feeds, discussions, messaging, profiles, subscriptions, and AI-powered study tools including Sage chat, quizzes, summarization, and assignment analysis.

Mobile App

- Developed a separate Expo/React Native application with native navigation, authenticated social/resource flows, AI tools, PDF and Markdown/KaTeX rendering, notifications, persisted server state, gestures, and bottom sheets.

Admin Dashboard

- Built platform administration tooling for courses, faculties/departments, resources, submissions, reports, payments, plans/subscriptions, content, settings, and operational dashboards.

Studora PDF Processing Service | Document Intelligence Pipeline

Python • FastAPI • PyMuPDF • pdfplumber • Modal • BGE embeddings • PostgreSQL

- Built a Python service for PDF extraction, section detection, chunking, structured summaries, OCR-required detection, persistence, and downstream AI retrieval.
- Added duplicate-processing locks, progressive status handling, Modal offloading, and 384-dimensional BGE embeddings for reliable, memory-efficient processing.

FirstBookings | Travel Booking Platform

Next.js • TypeScript • Prisma • PostgreSQL • Clerk • PDF tickets • Barcode generation

- Designed a multi-domain booking system spanning stays, flights, road travel, operators, passengers, payments, discounts, locations, and booking lifecycle states.
- Built booking sessions, pricing logic, payment endpoints, booking history/detail flows, downloadable PDF tickets, and server-generated barcodes.

ADDITIONAL PROJECTS

HDC Clothing - full-stack fashion e-commerce • Prext ERP • Schola Hub / ERP • Qlink

EDUCATION

B.Sc. Computer Science | Moses Orshio Adasu University, Makurdi
